

360Control

360Control

Flexible. Fully-Integrated. Focused.

A Business Card Management Tool Unlike Any Other

What if you could find a solution that provided your credit union with game-changing insights into your business cardholders' behavior, while also offering those cardholders valuable card management tools?

What if that solution also gave you administrative access to manage everything you'd need to do for your business credit card program in a given day: close cards, change limits, order replacements?

Whether it's for your small business clients, midsize business members or your credit union employee card accounts, 360Control does all this and more from a flexible, easy-to-use, web-based platform that you can customize to meet the needs of your credit union.

Want to see which merchants your cardholders prefer? Done. Want to group your preferred merchants to pull transaction reports related to just them? Easy.

With 360Control, you'll have the tools you'll need to let your cardholders' transactions show you what your most profitable next steps should be to grow your business credit card program.

Solution Summary

360Control is a flexible, web-based, end-to-end business credit card management tool that allows credit unions to easily manage and grow their card programs.

- *Real-time card management including creating new cards, closing cards, ordering replacement plastic, changing credit limits, and much more.*
- *Customizable access for each user, from administrator to cardholder.*
- *Cardholder tools including transaction management, receipt scanning, as well as non-card transactions, such as mileage or out of pocket spend.*
- *Powerful compliance and control with daily views of spend, ensuring early fraud detection.*
- *Detailed analysis of merchant spend, with the ability to create customized merchant group reports.*
- *Advanced filtering options for customized reports, plus standard reports on cost allocation, transaction lifecycle, and merchant analysis.*

How It Works

360Control supports your credit union and business cardholders with a range of customizable features. Cardholders can access the information they need to track and manage their expenses. Your cardholders will be able to:

- Add out-of-pocket and mileage items
- Take advantage of prepopulated claims
- Attach receipts with image capture
- Setup email alerts

For credit unions, 360Control can automate card services and provide the information you need to identify preferred merchant activity, prevent fraud, and access customized reports online, any time.

360Control provides credit unions with:

- Online reporting and analysis
- Early fraud detection
- Merchant based reporting
- Individual and global cardholder usage reporting
- Scheduled reports and emails
- A consistent branded experience for members

All of this, plus, 360Control can be fully integrated with your current financial systems, so you can pull accurate, real-time reports on a daily, weekly, or monthly basis.

Powerful Insights to Accelerate Growth

With 360Control's powerful suite of tools, your credit union will have unprecedented access to cardholder information as well as merchant level reporting, to help you make the best decisions to grow your portfolio.

More important, your credit union will be able to set up customized access levels for users – giving the right people the right permissions to provide your cardholders with the best possible experience.

From cardholder user to manager, administrator, or a reports-only viewer, the customized access ensures that your credit union is in full control.

With 360Control, you will have the powerful insight necessary to create incredible prosperity for your credit union's credit card portfolio.
